Which collagen stick should you buy?

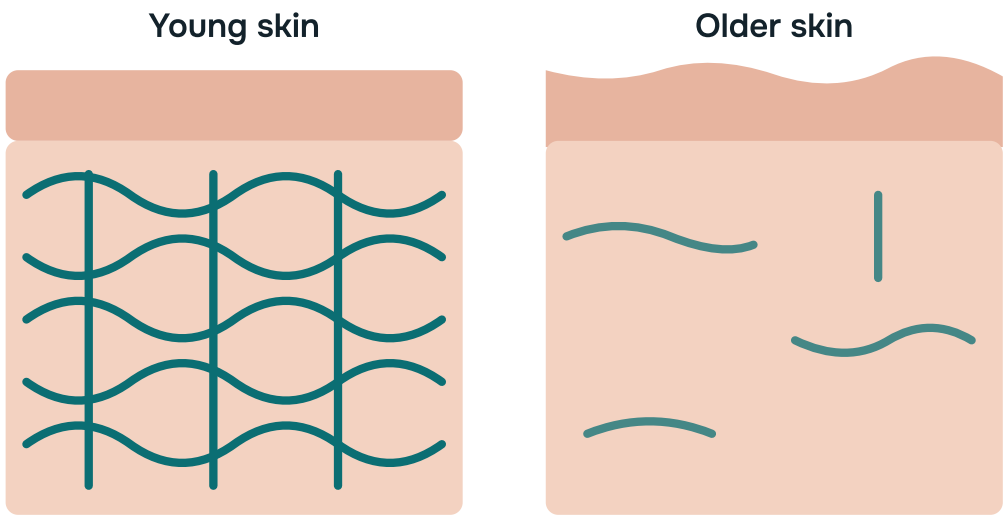

We checked the labels of 9 Korean fish collagen sticks. The score shows how good the inside of the stick is. Higher score = better product. More coloured blocks = better. Price is shown on the right, but it does not change the score.

Great (7 and up) · Okay (5 to 6.9) · Weak (3 to 4.9) · Poor (under 3)

RANK	PRODUCT	SCORE	COLLAGEN PER STICK	SMALL PIECES (DA)	VITAMIN C	CLEAN FORMULA	PRICE PER GRAM · NOT IN SCORE
1	 YOROSUM Glow Peptide 30 sticks × 3 g · ₩19,900	8.4/10 EXCELLENT	2,000 mg	300 Da	100 mg	Good	₩332/g ₩663 per stick
2	 HURUM Small Molecular Fish Collagen 60 sticks × 2 g · ₩23,000	7.2/10 VERY GOOD	1,200 mg	300 Da ◆	120 mg	Some filler	₩319/g ₩383 per stick
3	 MIPPEUM Collagen Jelly Mix Package 45 sticks × 20 g · ₩42,800	5.0/10 WEAK	1,600 mg ◆	Under 600 Da ◆	None listed	Some filler	₩594/g ₩951 per stick
4	 SSF Real Pomegranate Collagen Jelly 100 sticks × 20 g · ₩39,370	4.9/10 WEAK	1,000 mg	300 Da	4 mg	Some filler	₩394/g ₩394 per stick
5	 BB LAB Goodnight Collagen 50 sticks × 2 g · ₩22,870	4.8/10 WEAK	1,200 mg	1,000 Da	30 mg	Good	₩381/g ₩457 per stick
6	 BOTO Glutathione White Collagen 30 sticks × 4 g · ₩8,630	4.6/10 WEAK	800 mg	2,000 Da	220 mg	Tiny extras	₩360/g ₩288 per stick
7	 BB LAB Collagen Biotin Plus 50 sticks × 2 g · ₩21,900	4.2/10 WEAK	1,200 mg	1,000 Da	30 mg	Tiny extras	₩365/g ₩438 per stick
8	 HURUM Biotin Collagen Peptide 90 sticks × 2 g · ₩22,000	4.0/10 WEAK	500 mg	Not on box	120 mg	Tiny extras	₩489/g ₩244 per stick
9	 VITASUB Slim Collagen Plus 30 sticks × 2 g · No price	1.3/10 AVOID	196 mg	Not on box	200 µg	Tiny extras	No price

◆ = number from the seller's website, not printed on the box. Pages 2 to 9 explain each column in simple words. The exact formula is on the last page.

Collagen is the spring inside your skin

1. Collagen is a **protein**. It makes long, strong threads inside your skin, bones and joints.
2. Think of a mattress. Collagen threads are the **springs** that keep skin firm and bouncy.
3. As we get older, the body slowly **makes less** collagen. That is why people buy collagen drinks and sticks.

There are different types. For skin, you want Type I.

Type I

Skin, hair, nails, bones. About 9 out of 10 parts of your body's collagen. Comes from **fish** or cow.

Type II

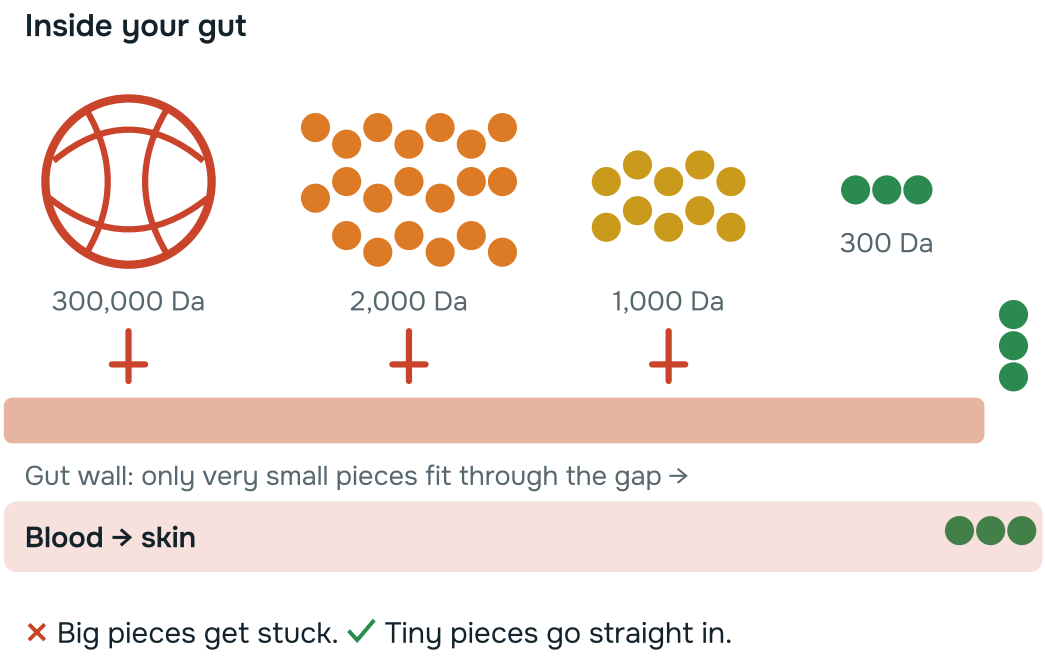

Joints and knees. Comes from chicken. Not used for skin products.

Type III

Skin and blood vessels. Works next to Type I. Comes from cow or pig.

All 9 products here use fish collagen. Fish collagen is Type I, the skin type. Good.

Da tells you how big the collagen pieces are. Smaller is better.

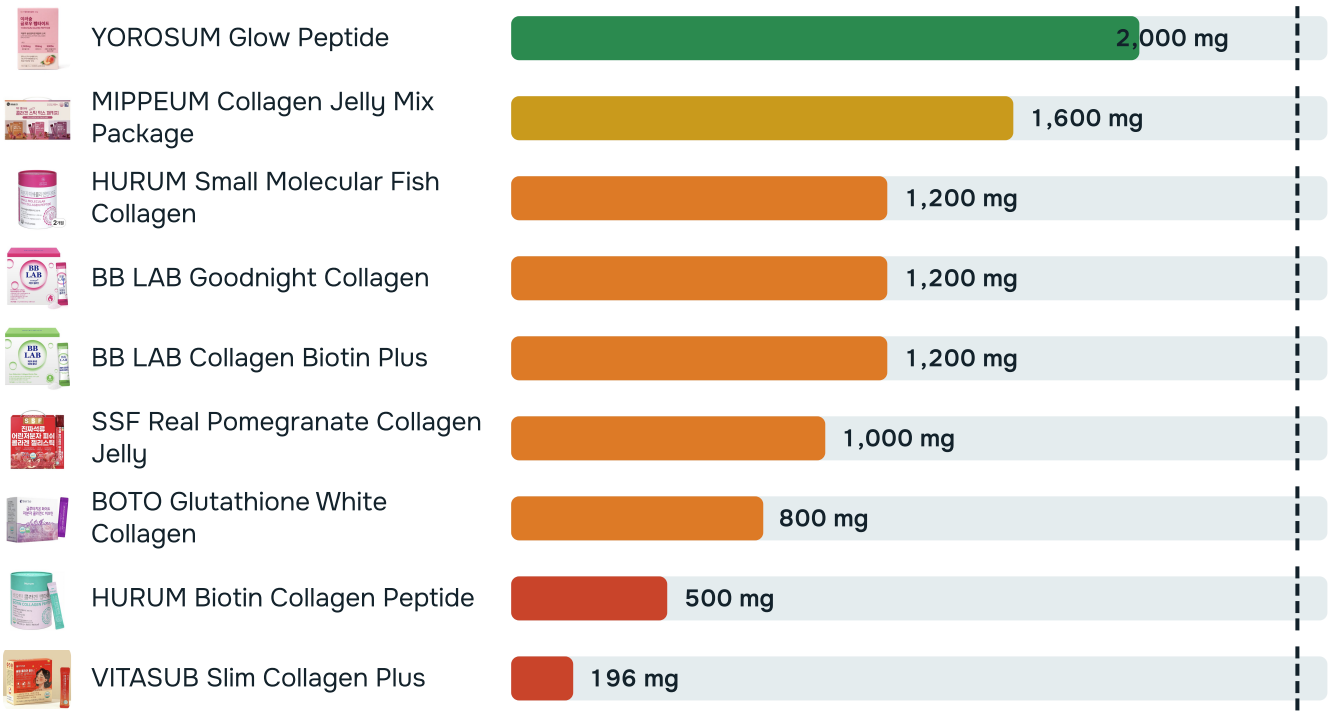

1. **Da** (dalton) is how scientists weigh very small things like molecules. Big number = big piece. Small number = small piece.
2. Collagen is a long chain of tiny beads. Makers cut the chain into short pieces so the body can take it in.
3. The gut takes in pieces of **2 or 3 beads** most easily. That is about **300 Da**. Pieces of 1,000 or 2,000 Da must be cut smaller by the body first.

300 Da	1,000 Da	2,000 Da	Not on box
Best	**Okay**	**Weak**	**Ask the seller**
Yorosum, HURUM, SSF	BB LAB (both)	BOTO	HURUM Biotin, VITASUB

Look for "평균분자량" (average molecular weight) on the box. 300 Da or lower is the best you can buy.

Small pieces are good. But you also need enough of them.

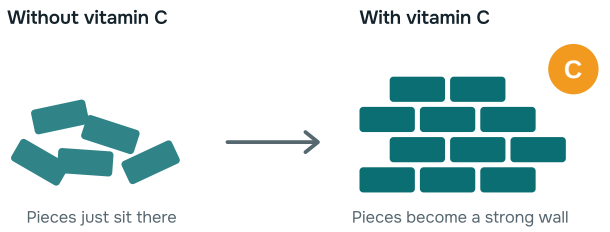

In skin studies, people took **2,500 mg or more** of collagen a day. The dashed line shows that amount. Longer bar = more collagen in one stick.

Dashed line = 2,500 mg, the daily amount used in skin studies.

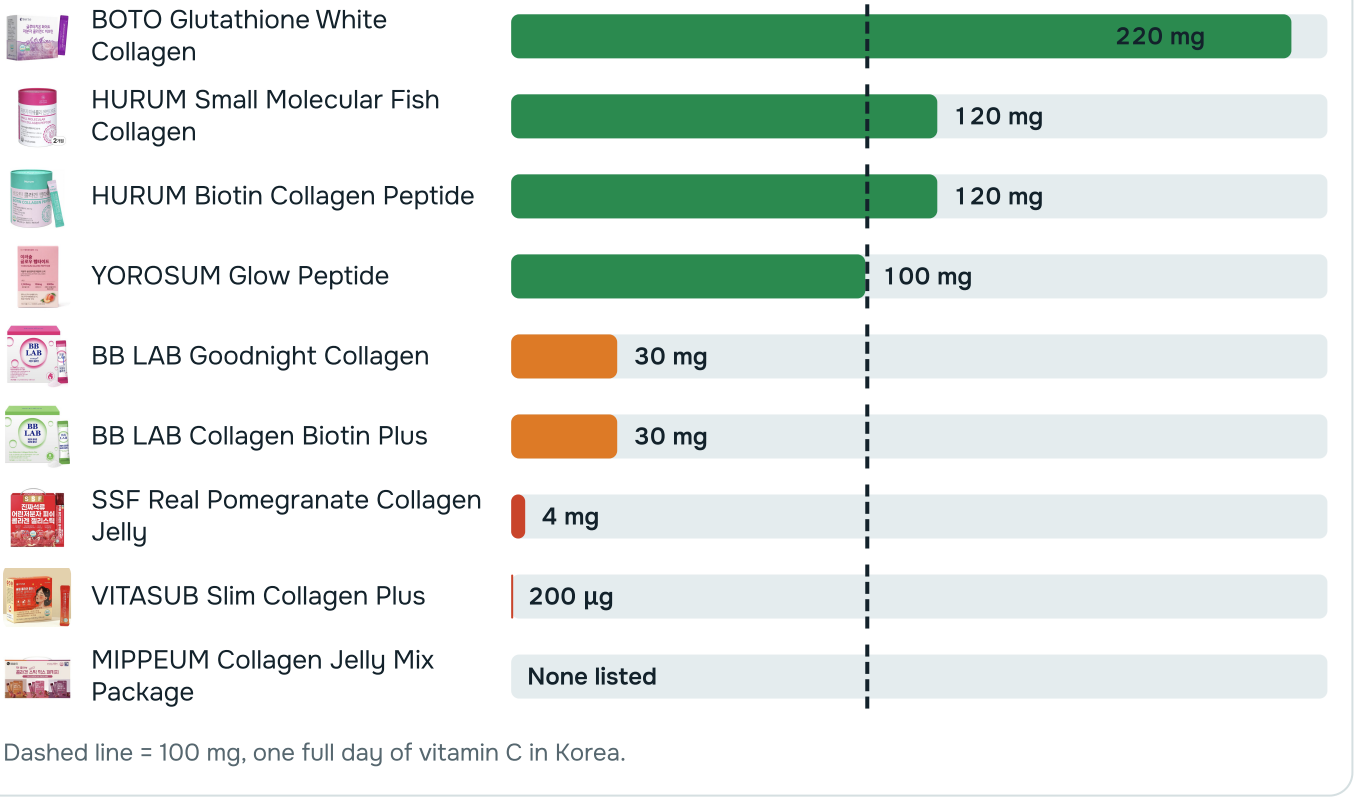

Yorosum gives the most collagen per stick: 2,000 mg. VITASUB gives only 196 mg, 10 times less.

Vitamin C is the builder that turns collagen pieces into skin

100 mg vitamin C = 100% of one day's need (Korea)
USA: 90 mg · Europe: 80 mg

1. Collagen pieces are like **bricks**. Vitamin C is the **builder**. Without it, the body cannot build strong new collagen.
2. Vitamin C does not push collagen into the blood. Its job comes after that: it helps **build** the collagen in your skin.
3. A good stick gives about **100 mg**, one full day of vitamin C. We give 10/10 at 100 mg or more.

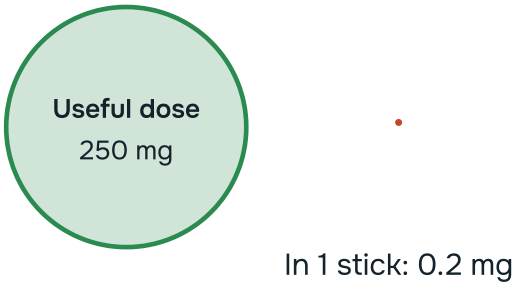

Dashed line = 100 mg, one full day of vitamin C in Korea.

Don't be fooled by fancy words on the box

Many boxes say "Glutathione", "Biotin" or "Hyaluronic acid" in big letters. But the amount inside is often a tiny drop. A tiny drop does nothing.

Glutathione in VITASUB

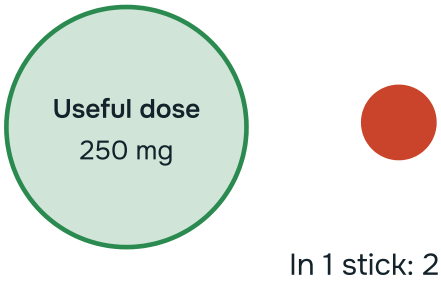

In 1 stick: 0.2 mg

1,250 sticks

You would need to eat this many sticks to get one useful dose.

Glutathione in BOTO

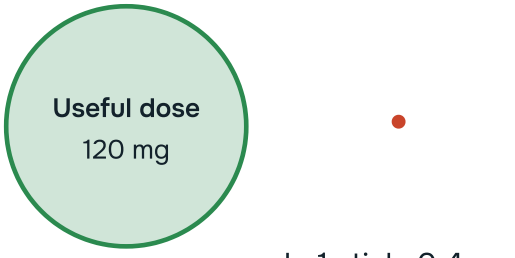

In 1 stick: 25 mg

10 sticks

You would need to eat this many sticks to get one useful dose.

Hyaluronic acid in HURUM Small Molecular

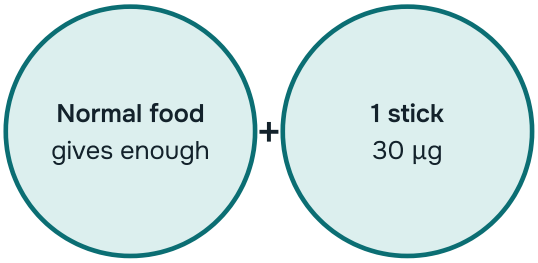

In 1 stick: 0.4 mg

300 sticks

You would need to eat this many sticks to get one useful dose.

Biotin in BB LAB and HURUM Biotin

No extra effect

30 µg is one day's basic need, which normal food already gives. More biotin does not improve skin or hair unless you lack it.

A long list of extras is not a sign of quality. Check the amount in mg. If it is tiny, ignore it.

Find the real collagen amount in 3 steps

Many boxes show a **percentage (%)**, not milligrams. Here is how to turn it into mg. Example: HURUM Small Molecular.

Box label (example)

1 저분자피쉬콜라겐펩타이드 60 %

비타민C 6 %

2 120 g (2 g × 60포)

1 Find the collagen **%**.

60%

2 Find the weight of **one stick** (포 = stick). 1 g = 1,000 mg.

2 g = 2,000 mg

3 Multiply. This is the real collagen in one stick.

2,000 × 60% = 1,200 mg

Watch out for big box numbers

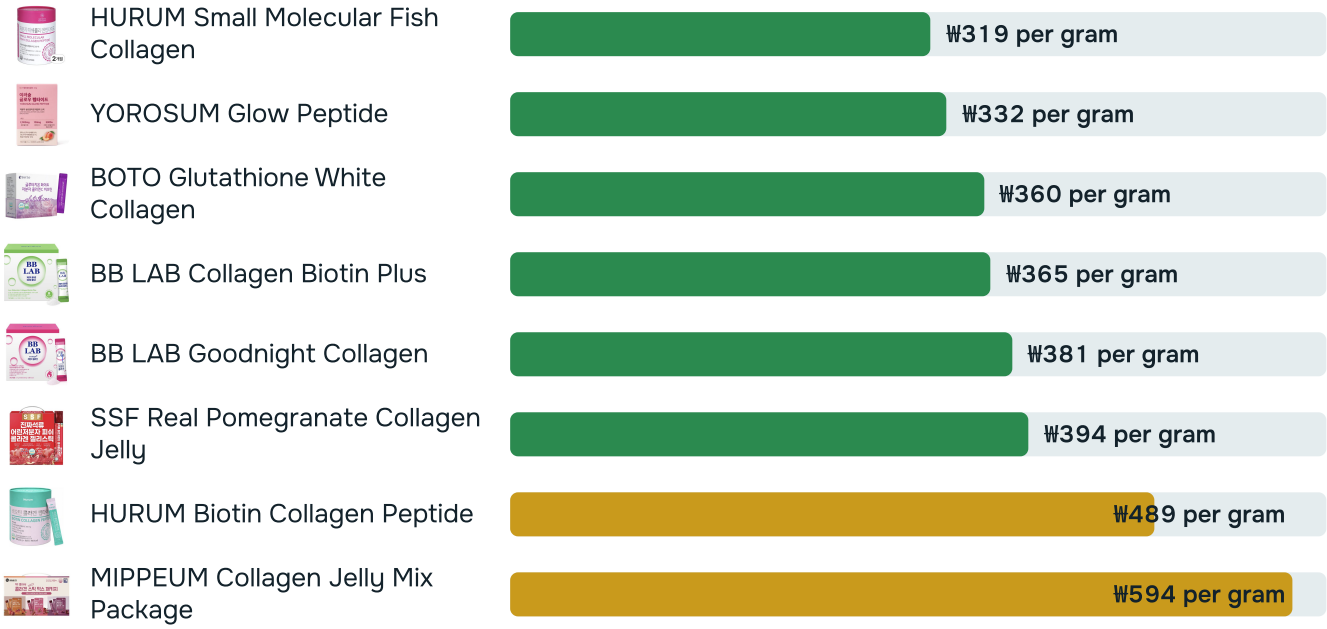

The SSF box says **"100,000 mg"** collagen. That is for the **whole box of 100 sticks**. One stick has 1,000 mg. Always count per stick.

Korean words to know on the box

저분자	Low molecular (small pieces)
피쉬콜라겐 / 생선콜라겐	Fish collagen
평균분자량	Average molecular weight (the Da number)
1포당	Per stick
비타민C	Vitamin C
기타가공품	General food. Not a health functional food (건강기능식품), so the box cannot promise health results.

Compare price per gram of collagen, not price per box

Boxes have 30 to 100 sticks, so the box price can trick you. Divide the price by the total grams of collagen in the box. Shorter bar = cheaper collagen.

VITASUB is not shown because no price is listed.

BOTO has the cheapest box (₩8,630). But its collagen costs more per gram than HURUM or Yorosum, and the pieces are big (2,000 Da).

6 questions before you buy

- Is it **fish collagen** (Type I)?
- Is the Da on the box, and is it **300 Da or lower**?
- Is there at least **1,000 mg** collagen per stick? 2,000 mg or more is best.
- Is there about **100 mg vitamin C** per stick?
- Are the extras big enough to matter, or just **tiny drops**?
- What is the price per **gram of collagen**?

◆ Not printed on the front pack (seller listing). Confirm with the supplier's certificate of analysis.

Per-stick amounts are calculated from percentages and stick weights printed on each pack. MIPPEUM figures and the HURUM Small Molecular 300 Da figure come from seller listings. Prices are the last retail prices checked; request current wholesale quotes.

This guide compares product labels for buying decisions. It is not medical advice and makes no health claims for any product. YOROSUM is the publisher's own brand; the full scoring formula is shown so anyone can check it.

DETAILS FOR SPECIALISTS

How the score is calculated

Collagen per stick: mg ÷ 250, max 10	**2 parts**
Molecular size: ≤300 Da 10, ≤600 8, ≤1,000 6, ≤2,000 4, not disclosed 3	**2 parts**
Vitamin C: mg ÷ 10, max 10	**1.5 parts**
Clean formula: extras at useful doses, no filler (judged)	**1.5 parts**

Score = weighted average of the four rows (2 : 2 : 1.5 : 1.5, about 29%, 29%, 21%, 21%). Price is not part of the score because retail prices change often and wholesale prices differ; price per gram is shown separately. Glutathione, biotin and hyaluronic acid earn no points below studied doses (glutathione 250–1,000 mg/day; hyaluronic acid 120–240 mg/day; biotin 30 µg only meets the daily adequate intake).

Strengths and weaknesses of each product

1. YOROSUM Glow Peptide (8.4)
Strengths: Most collagen per stick (2,000 mg); 300 Da printed on pack; 100 mg vitamin C; second-cheapest per gram.
Weaknesses: About 0.57 g per stick not itemised on front pack; elastin is a trace amount; ₩663 per stick.

2. HURUM Small Molecular Fish Collagen (7.2)
Strengths: Cheapest per gram (₩319/g); 120 mg vitamin C; short, clean formula.
Weaknesses: 1,200 mg is under half the 2,500 mg benchmark; 300 Da not on front pack.

3. MIPPEUM Collagen Jelly Mix Package (5.0)
Strengths: 1,600 mg collagen; under 600 Da; three flavours.
Weaknesses: Most expensive per gram (₩594/g); no vitamin C declared; sugary fruit base.

4. SSF Real Pomegranate Collagen Jelly (4.9)
Strengths: 300 Da; 100 g collagen per box; jelly format.
Weaknesses: "100,000 mg" on front is the box total; only 4 mg vitamin C; mostly fruit concentrate (about 45 kcal per stick).

5. BB LAB Goodnight Collagen (4.8)
Strengths: Adds glycine and proline, the main collagen amino acids; well-known brand.
Weaknesses: 1,000 Da; vitamin C only 30 mg.

6. BOTO Glutathione White Collagen (4.6)
Strengths: 220 mg vitamin C; lowest box price; HACCP and Halal.
Weaknesses: Collagen only 20% of stick (800 mg); 2,000 Da; glutathione far below useful dose.

7. BB LAB Collagen Biotin Plus (4.2)
Strengths: Low price for 1,000 Da collagen.
Weaknesses: Vitamin C 30 mg; biotin is the headline but adds no proven skin benefit.

8. HURUM Biotin Collagen Peptide (4.0)
Strengths: 120 mg vitamin C; cheapest per stick (₩244).
Weaknesses: Only 500 mg collagen; Da not disclosed; tiny extras.

9. VITASUB Slim Collagen Plus (1.3)
Strengths: None at the declared doses.
Weaknesses: About 196 mg collagen; 0.2 mg vitamin C; "whitening" icon on a general food; no price listed.
