TAQQOSLASH JADVALI

Qaysi kollagen stiki eng yaxshi?

10 tadan 8 ta bo‘lak = 8 ball

Bo‘laklarni qanday o‘qish kerak. Har bir qator bitta ko‘rsatkichni 10 ballik shkalada baholaydi. Bo‘yalgan bo‘laklar — bu ballar: 8 ta bo‘yalgan bo‘lak 10 dan 8 degani. Yashil — kuchli, sariq — o‘rtacha, to‘q sariq va qizil — zaif. Qiymat ostidagi kichik son — shu qatorning bali.

Umumiy ball qanday hisoblanadi. Bu baholanadigan to‘rt qatorning vaznli o‘rtachasi: stikdagi kollagen (2 ulush), bo‘lakcha o‘lchami (2 ulush), C vitamini (1,5 ulush) va toza tarkib (1,5 ulush). Qutidagi stiklar soni (nom ostida) faqat ma’lumot uchun, u baholanmaydi.

Ma’lumotlar: bitta stikdagi miqdor har bir mahsulot yorlig‘i asosida hisoblangan (quti fotosuratlari, 2026-yil oktabr). MIPPEUM ma’lumotlari va HURUM past molekulyar kollagenining 300 Da ko‘rsatkichi sotuvchi saytlaridan olingan, chunki ular qutining old tomonida yozilmagan. To‘liq uslub va manbalar ilova qilingan qo‘llanmada.
