COMPARISON SHEET

Which collagen stick is best?

Full bar = 10 points; this one is 8

300 Da 2000 Da

How to read the table. Bars show points out of 10: a full bar is 10 points. Coloured pills show categories: green is strong, yellow is average, orange and red are weak. Grey text means the box does not say. The small number under each value is that row's points.

How the overall score is made. It is the weighted average of the four scored rows: collagen per stick (2 parts), piece size (2 parts), vitamin C (1.5 parts) and clean formula (1.5 parts). "In one box" (under each name) is information only and is not scored.
