Registration in Kazakhstan, Kyrgyzstan (EAEU) and Uzbekistan: `planned / in progress / certificate no.` We supply the technical dossier and local-language label artwork.

OEM Manufacturing & Quality

WHO MAKES IT, HOW IT IS CONTROLLED

YOROSUM is a brand company: we own the formula, the brand and the market relationship. Production is done by a specialised, licensed Korean food manufacturer. Most leading supplement and K-beauty brands in Korea work the same way. You get factory-grade production with a small brand's flexibility and direct attention.

RAW MATERIAL

ATHOS Collagen, India

Low-molecular freshwater fish collagen peptide. Imported into Korea by Yerba Korea with specification and origin documents.

MANUFACTURER (OEM)

Korea CNS Pharm Co., Ltd.

Licensed food manufacturer (식품제조가공업 no. 20030445025), Eumseong, Chungbuk. Produced in its own facility, with no sub-contracting.

BRAND OWNER

Silla Global Trading

Formula, specification, brand and registrations. Your single point of contact for supply, documents and marketing.

Consistent quality, batch after batch

Every batch is released against a fixed specification and tested before shipment. You receive the COA for your lot.

Supply that scales with you

First production run: 2,700 boxes. Re-orders run on the same line and specification: `__ boxes/month capacity`.

Adapted to your market

Local-language labels, pack sizes and bundles can be arranged with the factory for your market.

Documents ready for registration

Product report, formula ratios, specification and test reports already exist. That shortens EAEU and Uzbek registration.

More margin in your channel

We don't carry factory overhead, so more of the shelf price goes to distributor and retailer margins.

Private label option

Want your own brand? Through the same manufacturer we can develop a private-label collagen stick for you.

QUALITY ASSURANCE CHAIN

1. **Raw material intake**
   Supplier spec, origin and lot records checked
2. **Production**
   Formula fixed in the registered product report
3. **In-process control**
   Fill weight (3 g ± 3%), seal and print checks
4. **Finished-product testing**
   Moisture, vitamin C, metal detection, E. coli
5. **Release with COA**
   Pass verdict signed before any lot ships

LATEST COA · BATCH RA88201

TEST	STANDARD	RESULT
